In all well regulated postoffices there is an outer and an inner door. The outer door is for the convenience of the public, the inner door for the postoffice employees. If you wish to obtain your mail you will pass in at the outer door and advance to the window. You will make your presence known by several distinct raps or by pounding on your box if you have one. Any racket will be noticed. The postmaster, hearing you, will step to the window and you will give the first two initials of your name. If he is satisfied he will give you your mail; if he is not satisfied you should give him your full name and the number of your box. If still in doubt you may spell your name in full and then the postmaster will be satisfied and will give you your mail. After he has given it to you don't forget to ask him if that is all. If he says there is none, tell him there ought to be—he will appreciate the information.

WE are informed by Mr. A. F. Potter that Mr. Gifford Pinehot and Mr. F. V. Coville of the Department of Agriculture, who are coming to Arizona to examine the Forest Reserves for the purpose of ascertaining the effect of grazing upon the growth of timber and the water supply, will arrive at Winslow May 25, where they desire to have a representative from the Salt River Valley and Mr. Potter meet them and accompany them on a three weeks' trip through the Black Mesa Forest Reserve, commencing on the west and finishing at Rose Peak in Graham county, from where the party will go to Clifton and thence by rail to Phoenix, arriving there, probably, about June 20. After spending two or three days in the Salt River Valley, Messrs. Pinehot and Coville will go to Flagstaff and make an examination of the San Francisco Mountain Reserve. Mr. Potter has made arrangements for transportation, saddle horses and camp outfit for the party, and being familiar with every part of the Black Mesa Reserve will be able to assist greatly in making a complete examination. The route as above planned will give all interests a chance of being heard at home, and the investigation will undoubtedly be exhaustive and impartially conducted.

SECRETARY AKERS and wife are making an extended visit east.

THE Senate shows no haste in taking up the resolution for the selection of its members by popular vote.

JEFFRIES still holds the heavyweight championship, having put out Corbett on the 10th in twenty-three rounds.

A DOZEN tornadoes are reported from Kansas. They must have mistaken the date and got ahead of the Democratic convention.

THE Texas State Teachers' Association will meet at El Paso June 26, 28 and 29. Low rates on all railroads in New Mexico and Arizona will be given for the occasion.

ALL the Republican state platforms yet made point to the prosperity of the country with more or less manifestations of pride. The Democratic platforms studiously avoid this subject.

IT MAY be worthy of mention that Cleveland didn't get angry all thro' his three Presidential campaigns, but that when somebody accused him of intending to vote for Bryan, he raised the roof.

SO FAR from being a dull, spiritless meeting, it now seems that the Philadelphia convention will be one of the most enthusiastic and spirited in the history of the Republican party. In point of orators alone it will be worth going miles to participate in.

CAPITAL punishment is becoming more abhorrent as the race becomes more civilized. Public executions cheapen the value of life more than does the taking of life as the result of quarrels. The number of citizens who declare against capital punishment when called as jurors to try murder cases are increasing rapidly.

CONGRESS will probably adjourn about June 12, and the Republicans, at least, will go home to a well earned vacation. There has not been for years a session at which so much legislation of the first importance to the country has been transacted. The measures which have passed one House and been laid over till next winter to pass the other, will suffer no harm by the short delay.

IT is said that the new shell, recently invented by an officer of the American navy, goes through the best 12 inch Krupp armor as readily as a Krag-Jorgenson bullet goes through a 2-inch plank. The matter has caused so much excitement among senators that the bill providing our new ships with armor has been laid aside till it can be seen whether the armor is going to be of any value.

THE White Oaks Eagle says that the populists of New Mexico are for Bryan. There are less than a dozen populists in the territory. In fact, there are only two, Col. Mills of Las Vegas, and M. P. Stamm of this city. They are divided, Mills favoring the Sioux Falls crowd, while Stamm favors the Cincinnati outfit. Neither of these gentlemen attended either of the populist national conventions.—Albuquerque Citizen.

A Life And Death Fight.

Mr. W. A. Hines of Manchester, Ia., writing of his almost miraculous escape from death, says: "Exposure after measles induced serious lung trouble, which ended in Consumption. I had frequent hemorrhages and coughed night and day. All my doctors said I must soon die. Then I began to use Dr. King's New Discovery for Consumption, which completely cured me. I would not be without it even if it cost \$5.00 a bottle. Hundreds have used it on my recommendation and all say it never fails to cure Throat, Chest and Lung troubles." Regular size 50c and \$1.00. Trial bottles free at F. J. Watron's Drug Store.

Silk Industry.

A wealthy Japanese silk grower, when in San Diego, Cal., recently, stated that section was far better suited to silk worm culture than any section of the country he has ever visited. The Chamber of Commerce began to look into the silk industry. It was found that France provides a season for the silk worm of but forty-two days, while in San Diego four crops of cocoons can be raised each year, and the season lasts 240 days. The Chamber of Commerce is now devoting its energies to silk culture. Five thousand mulberry trees will be distributed at once, and arrangements have been made for the purchase of a large quantity of silk worms. Mrs. Williams, who is known in the Department of Agriculture at Washington as an expert on silk culture, is now a resident of San Diego, and she asserts that the industry will thrive there better than in any other part of the country.

Fortunately the colleges will soon graduate their senior classes and the administration will be able to derive all the information and advice needed from their essays.

The ancients believed that rheumatism was the work of a demon within a man. Any one who has had an attack of sciatic or inflammatory rheumatism will agree that the infliction is demonic enough to warrant the belief. It has never been claimed that Chamberlain's Pain Balm would cast out demons, but it will cure rheumatism, and hundreds bear testimony to the truth of this statement. One application relieves the pain, and this quick relief which it affords is alone worth many times its cost. For sale by F. J. Watron, druggist.

It has been discovered that some sorts of ice contain 5,783,324,891 microbes to the square inch. We suppose now there is nothing left to do except to boil the ice.
